

Valentina Pasquale

**Research Data Steward Coordinator
Italian Institute of Technology**

Valentina Pasquale coordinates the Research Data Management and Stewardship Office at the Italian Institute of Technology (IIT). Since 2019, she has been designing and developing services, policies, and tools to support researchers in improving the FAIRness of scientific data. She contributed to the establishment of the Italian Data Steward Community and serves on its steering board. Trained as a bioengineer, she earned a PhD in Humanoid Technologies from the University of Genoa in 2010 and subsequently worked as a data scientist in the field of Computational Neuroscience. Her current interests focus on research data management, data stewardship, and the adoption of FAIR practices across the research lifecycle.
