

Marco Molinaro

Senior Researcher
National Institute for Astrophysics

Marco Molinaro is a Senior Researcher in Information Technology at INAF (National Institute for Astrophysics), working on data management and data curation of astrophysical resources, with a focus on adherence to FAIR principles and Open Science paradigm of the same. Since more than a decade involved in the International Virtual Observatory Alliance where he currently covers the role of chair of the Technical Coordination Group, and representative of the Italian astronomical community in the Executive Committee. Involved in activities in the EOSC landscape since the ESCAPE cluster project (in continuation to previous astrophysical Virtual Observatory projects), not least through the Astro-CC cascading grant of the OSCARS project.
