[Genesis RFA Phase I Teams: Genesis Resources Planning Questionnaire – Fill out form](#)

EoY1 Checkpoint discussion

Discussed with Jeremy @ HEP IDA Pilot and Genesis Meeting

Good to have this before Year 2 in September and find synergies with *Genesis Phase 1/CLARIPHY AI collaboration* (September 14-16, Madison WI)

Scope:

- **1 presentation per Lab**
- Deliverables VS What was achieved/plan to achieve it
- What do you and your team plan on achieving next year
- Evaluate resources used in Year 1 and what's needed for Year 2
- Evaluate how to spend carryover in Year 2?

Synergies with Genesis 1 proposals:

- Is the data and tokenized datasets available such that people in Phase 1 can use?
- Is the code your team developed available with instructions?
- What and how do you plan to make it available to Genesis Phase 1 projects?
- What deliverable we have that we can share with Genesis Phase 1 projects? What are synergies we can leverage?

Road to Phase 2!

Targeting **Wednesday, September 9th**

Backup

July 29th, 2026

- Had a vote to change the time slot - Treasure - new meeting slot - When2meet
 - There was significant discussion, and we seem not to coverage on different slot
 - **For now, we will keep the meeting as is, but we will revisit this after summer**, especially as we try to include more folks
- **Genesis Phase-I awards:** [GM-RFA-Awards-List.pdf](#)
 - No awards directly connected to us were funded
 - However, there is still interest from people to connect to TREASURE
 - We will reach out
- Abstract for talk at EuCAIFCon 2026 has been accepted!
 - If people want to submit abstract for talk, please go ahead and let us know

July 15th, 2026

Make sure to vote for the potential time-change by the end of the week! [Treasure - new meeting slot - When2meet](#)

Info about **Genesis Phase-I awards** expected within 1 wk

Together with phase-I awards, a new portal to request resources and computing time will be presented

- Resources taken from both academia and industry
- Time will be allocated to **projects**; requests will be matched with available resources
 - We should start working on realistic requests for resources and justification
 - Unclear if existing resources will be taken into account
- Should be online by July 22nd
