Wirecell Meeting Structure

SBND Wirecell Meeting

Prabhjot Singh, 28 Aug 2026

Current Meeting Structure

- Wirecell Group has made tremendous progress in the last few months
- We are both a development and physics oriented group
- In this 1 hour meeting slot, we cover several topics
 - General Wirecell Development
 - Wirecell Selections and Reconstruction Evaluation
 - DL Clustering
 - Michel Electron Analysis
- It is challenging to cover development and physics oriented updates in this one hour slot

New Proposal

- We propose to decouple development and physics oriented updates into two separate meeting schedules
 - Thursday 1 PM CT, our usual meeting time, for final physics slides only
 - For Development-focused discussion there are few options
 - [1]: Tuesday, 12 PM CT: our reserved wirecell slot
 - [2]: new poll to find a slot

Thursday: Physics Meeting

- Physics focused meeting also has several topics which are challenging to cover in one hour
- We further propose to divide it into biweekly focused topics
- One week focussed on Traditional Wirecell and Michel Electron Analysis
- Another week focussed on Advanced DL based reconstruction and SCE
- We will work one week in advance to finalize agenda and accordingly topics can be adjusted

Next

- Physics focused meetings will continue on Thursday 1 PM CT
- We will circulate a poll to find time for development focused meeting
