Dear Christine

After consultation with the C12 members, the members warmly agree with WG14 to be associated with C12.

In this direction let me inform and invite you to our next in-person meeting that will take place in Madrid in March or April 2027

Best regards and thanks for the initiative

Prof. Maria Jose Garcia Borge

Subject: Re: Insight regarding WG14 ?

Dear Maria Jose and Eberhard,

Just a kind reminder regarding the proposal below.

I also need to response to Marcelo Gameiro Munhoz (C11 Chair) , who confirmed that a standing Committee could be shared between 2 commissions.

Following the example of *WG9 on International Cooperation in Nuclear*

Physics, could we consider organizing an event connected to their Symposium (mentioned below and described [here](#)).

I could also highlight some C12 activities of interest , particularly in connection with the IAEA and the completion of the African School of Physics and Applications [ASP20026](#) (incl. the Kenyan Nuclear Physical Society and related initiatives)

Please let me know if you would be available for a short meeting to discuss possible opportunities and next steps.

Kind regards,
Christine

Subject: Insight regarding WG14 ?

Dear Maria Jose,

I hope this message finds you well.

I recently returned from the IAEA 2nd conference on accelerators for research and innovation, where I had the opportunity to meet with Eberhard Widmann. He reminded me on the excellent work being carried out by your commission and WG9.

He also mentioned the Symposium organized every 4 years, which led me to wonder we could consider developing a sister event (WG14).

As you may know, we are expected to finalize our Terms of Reference to become a Standing Committee before the next IUPAP GA.

Although we are currently affiliated with C11, we share many common interests with C12.

I would greatly appreciate your advices before we finalize our Terms of Reference.

Regarding recent activities organized by IUPAP WG14, we have now selected the participants for our young [Accelerator Engagement Ambassadors Initiative](#) and we have successfully organized a [Hackathonino \(IUPAP-WG14\)](#) at IPAC26.

Although we are approaching the summer period, perhaps we could schedule a short zoom meeting in the coming weeks (preferred after July 19). Please let me know your availability.

Kind regards,
Christine
