Erich Vogt –An Inspirational Physics Professor

Thursday 19 June 2014 16:15 (15 minutes)

Erich Vogt's passion for teaching is well known; he taught first-year physics for decades at UBC. He made learning physics fun and entertaining. Although he is a giant in the Canadian physics community, young students knew him as an approachable and caring professor. More importantly, he inspired his students to become infatuated with physics. In this talk, I will describe experiences from those who interacted with him in first-year physics classes.

Author: POON, Alan (Berkeley Lab)

Presenter: POON, Alan (Berkeley Lab)

Session Classification: (R3-1) Erich Vogt Memorial Session II - DNP-PPD-DTP / Session à la mémoire d'Erich Vogt II - DPN-PPD-DPT

Track Classification: Nuclear Physics / Physique nucléaire (DNP-DPN)
