Higgs Particle Searches with ATLAS

Monday 16 June 2014 14:45 (30 minutes)

This contribution will present the latest results on the Higgs searches performed with the ATLAS detector, including beyond the Standard Model (BSM) Higgs searches, as well as the recently discovered Higgs particle consistent with the Standard Model (SM). Special attention will be given to the decays of the Higgs particle to gauge bosons.

Author: SCHOUTEN, Doug (TRIUMF (CA))

Presenter: SCHOUTEN, Doug (TRIUMF (CA))

Session Classification: (M1-4) Energy Frontier: Standard Model and Higgs - PPD / Frontière d'énergie: modèle standard et boson de Higgs - PPD

Track Classification: Particle Physics / Physique des particules (PPD)
