Physics Students as Museum Curators

Wednesday 5 June 2019 13:45 (30 minutes)

Third-year undergraduate physics students in our Science Communications course were assigned the task of designing, building, and testing hands-on activities tied to the grade 6 science curriculum. In partnership with the Guelph Museum, we then ran a week of activities for local-area schools to participate through field trips. This presentation will discuss the collaboration in more detail, highlighting feedback from elementary-school teachers and our student-designers. We had more than 700 students passing through the stations, and, building on the success of our first event, we are now planning for STEM Week 2019.

Author: Dr O'MEARA, Joanne (University of Guelph)

Presenter: Dr O'MEARA, Joanne (University of Guelph)

Session Classification: W2-1 Creative Education and Partnerships in Learning (DPE) | Éducation créative et partenariats d'apprentissage (DEP)

Track Classification: Physics Education / Enseignement de la physique (DPE-DEP)
