Quantum information and CP measurement in Higgs to tau tau at future lepton colliders

Tuesday 18 July 2023 18:40 (20 minutes)

We introduce a methodology and investigate the feasibility of measuring quantum properties of tau lepton pairs in the $\rightarrow \tau^+ \tau^-$ decay at future lepton colliders. In particular, observation of entanglement and violation of Bell inequalities are examined for the ILC and FCC-ee. As a by-product, we show that a novel model-independent test of CP violation can be performed and the CP-phase of $H\tau\tau$ interaction can be constrained with an accuracy comparable to dedicated analyses.

Authors: MALTONI, Fabio; SAKURAI, Kazuki; MAWATARI, Kentarou; ALTAKACH, Mohammad Mahdi; LAMBA, Priyanka

Presenter: ALTAKACH, Mohammad Mahdi

Session Classification: Higgs theory and experiment

Track Classification: Higgs theory and experiment
