Unique Properties of Secondary Cosmic Rays: Results from the Alpha Magneti Spectrometer

Tuesday 9 August 2022 14:40 (20 minutes)

We present high statistics measurements of the secondary cosmic rays Lithium, Beryllium, Boron, and Fluorine based on 10 years of AMS data. The properties of the secondary cosmic ray fluxes and their ratios to the primary cosmic rays Li/C, Be/C, B/C, Li/O, Be/O, B/O, and F/Si are discussed. The systematic comparison with the latest GALPROP cosmic ray model is presented.

Collaboration name

The Alpha Magnetic Spectrometer

Author: Mr CHEN, Yao (Shandong Institute of Advanced Technology (SDIAT) (CN))

Presenter: Mr CHEN, Yao (Shandong Institute of Advanced Technology (SDIAT) (CN))

Session Classification: Cosmic Rays

Track Classification: Cosmic Rays
