Search for Dark Matter with the PICO Experiment

Wednesday 10 August 2022 16:10 (20 minutes)

The PICO collaboration searches for WIMPs using large superheated liquid detectors, or bubble chambers. Recent results from the complete exposure of the PICO-60 C₃F₈ detector at SNOLAB set the world's most stringent limits on WIMP-proton spin-dependent interactions. I will present the current status of the construction and physics potential of the next generation, tonne-scale experiment at SNOLAB: PICO-500.

Collaboration name

PICO

Author: GIROUX, Guillaume (Queen's University)

Presenter: GIROUX, Guillaume (Queen's University)

Session Classification: Dark Matter

Track Classification: Dark Matter
