GAMBIT update

Thursday 11 August 2022 16:10 (20 minutes)

I give an update on GAMBIT, the Global And Modular BSM Inference Tool. After briefly describing the main features of the GAMBIT code, I highlight why GAMBIT is a promising framework to isolate sign of physics beyond the standard models (BSM) of particle physics and cosmology. Then I show the latest GAMBIT results for a model where the gravitino, and the neutralinos and charginos are the only light sparticles in the Minimal Supersymmetric Standard Model.
