

Session Program

26-30 May 2026

Astrophysics with Radioactive Isotopes 2026, Traverse City, MI, USA

Afternoon I

The Hagerty Center, Traverse City, Michigan, USA

Tuesday 26 May

14:30

Afternoon I

Session | **Location:** The Hagerty Center, Traverse City, Michigan, USA

14:30-15:10

The Future of Gamma-ray Instruments: COSI and the Remaining MeV Gap

Speaker

Tiffany Lewis

15:10-15:30

Toward all-sky gamma-ray line surveys with COSI

Speaker

Aravind Valluvan

15:30

Wednesday 27 May

14:30

Afternoon I

Session | **Location:** The Hagerty Center, Traverse City, Michigan, USA

14:30-15:10

Chemical evolution of Milky Way-like galaxies with zoomed-in cosmological simulations including long-term radioactive elements

Speaker

Valeria Grisoni

15:10-15:30

Chemical Separation of Presolar Grains from Meteorites

Speaker

Liv Mumma

15:30

Thursday 28 May

14:30

Afternoon I

Session | **Location:** The Hagerty Center, Traverse City, Michigan, USA

14:30-15:10

Constraining ^{44}Ti and ^{56}Ni yields via a direct $^{13}\text{N}(\alpha,p)^{16}\text{O}$ measurement

Speaker

Thanassis Psaltis

15:10
