

Session Program

13-17 Sept 2021

HEASA 2021

XRB II & HE Polarimetry

Wednesday 15 September

16:00

XRB II & HE Polarimetry

Session | **Location:** | **Convener:** Brian van Soelen

16:00-16:30 **Jets in accreting X-ray binaries**

Speaker

Andrzej Zdziarski

16:30-16:45

Hercules X-1 (Her X-1): New results from the past decade of observations

Speaker

Denis Leahy

16:45-17:00

The 2019 outburst of the accreting millisecond pulsar SAX J1808.4-3658

Speaker

Kelebogile Bonokwane

17:00-17:30

X-ray spectropolarimetric observations of black holes and magnetars with IXPE and XL- Calibur

Speaker

Henric Krawczynski

17:30-17:45

Monte-Carlo Applications for Partially Polarized Inverse External-Compton Scattering

Speaker

Lente Dreyer

17:45
