

**#021 – Poster E04**

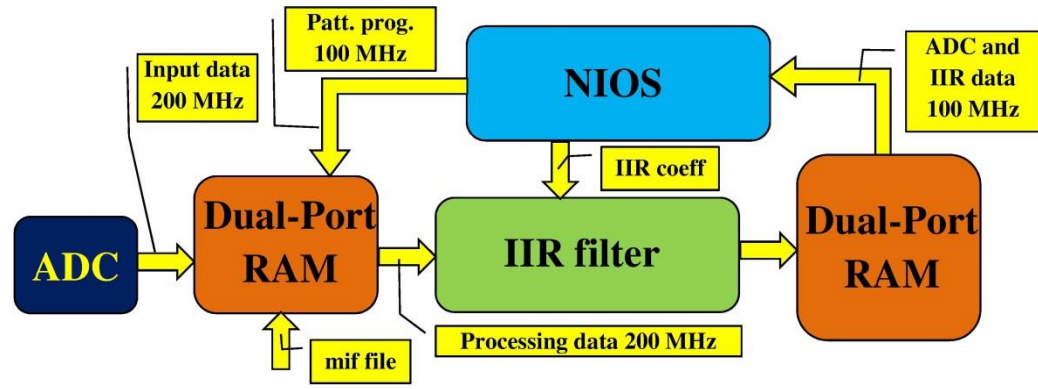

# **Adaptive IIR-notch filter for RFI suppression in a radio detection of cosmic**

**Zbigniew Szadkowski IEEE Member**

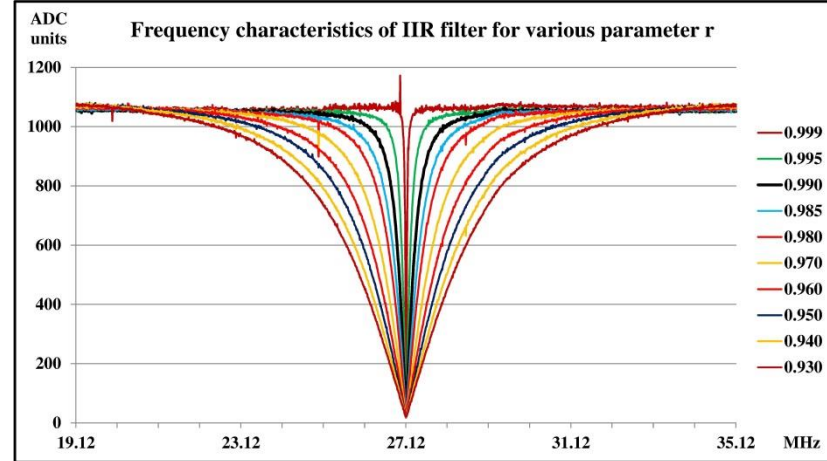

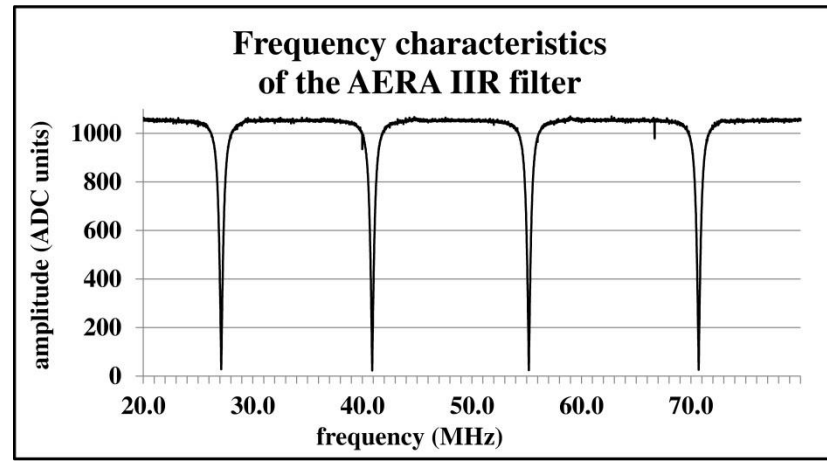

**University of Łódź**

**IEEE Real Time Conference, Padova, Italy, June 2016**

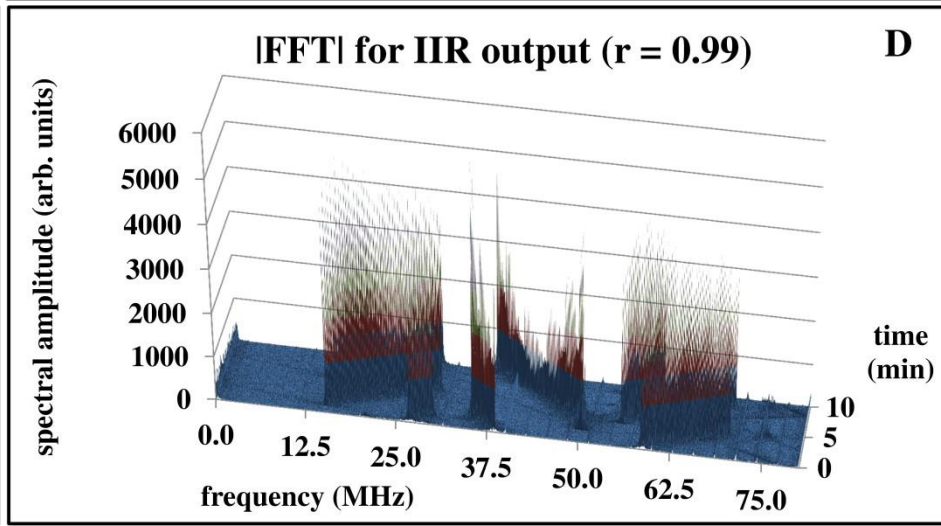

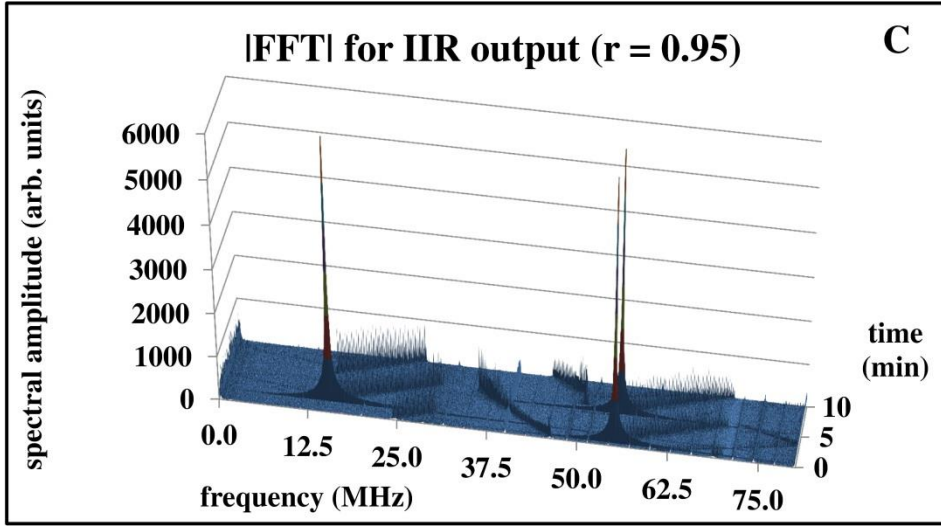

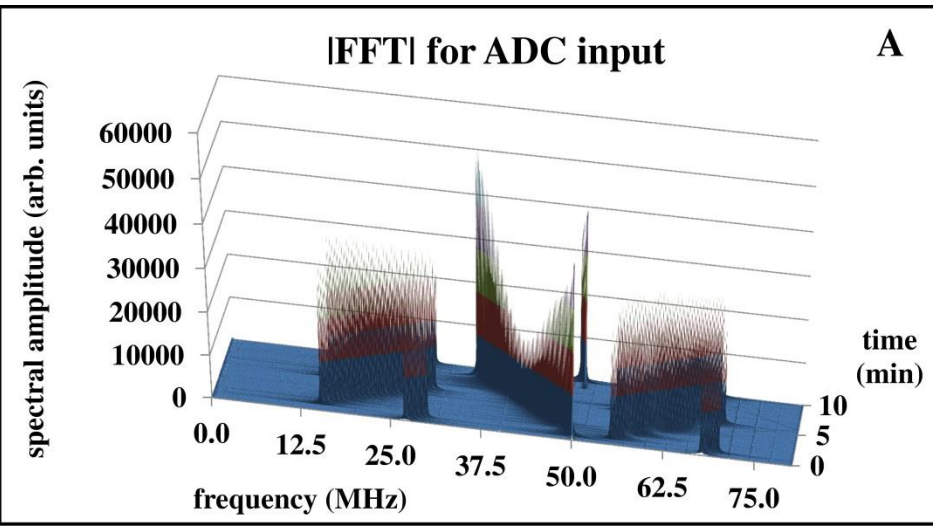

# Setup and freq. characteristics

$$y_k = x_k - (Ax_{k-1}) + x_{k-2} + (Ary_{k-1}) - (r^2y_{k-2})$$

# Suppression efficiency

# Timing and distortions

DURATION OF PROCESSES FOR EP4CE115F29C7 AND 5CEFA9F31I7

Processes	time (ms)
A transfer of 4096 samples from the DP-RAM to NIOS <sup>®</sup>	~9.7
Calculation of 4096-point FFT by Danielson-Lanczos algo.	~618
Calculation of FFT modules	~97
Calculation and transfer of IIR coefficients for 4 sub-filters	~13.4
