

## **Session Program**

**9-15 Jun 2018**

# **21st IEEE Real Time Conference - Colonial Williamsburg**

## ***Imaging and detectors***

Woodlands Conference Center  
159 Visitor Center Dr, Williamsburg, VA 23185

# Wednesday 13 June

10:40

## Imaging and detectors

**Session** | **Location:** Woodlands Conference Center, 159 Visitor Center Dr, Williamsburg, VA 23185 | **Convener:** Marc-André Tétrault

10:40–11:00

### Pixel Detector System for Pencil Beam Scanning Proton Therapy

**Speaker**

Michael Eichen

11:00–11:20

### Real-time Local Noise Filter in 3D Visualisation of CT Data

**Speaker**

Nicholas Tan Jerome

11:20–11:40

### An FPGA based high speed network processor - Preprocessing detector images relieving data backend systems

**Speaker**

Martin Brückner

11:40–12:00

### Characterization of TOF-PET Detectors Based on Monolithic Blocks and an ASIC-Readout

**Speaker**

Efthymios Lamprou

12:00–12:20

### Configurable and Expandable High Speed Trigger Supervisor for Imaging Data Acquisition System.

**Speaker**

Mr John McKisson

12:20
