How to present your work from abstract to poster

Tuesday 15 November 2022 16:45 (45 minutes)

Some simple 'personal' suggestions & guidelines extracted from my own long experience illustrated with some typical examples taken mostly from NPSS material like conferences workshop and instrumentation schools. This lecture on science writing intend to train young scientists to become more effective and confident writers. It will address some essential and challenging skills like:

- Scientific writing: structure and format according to the target (conference record, journal papers, status report, grant proposal ...etc.) reviewing: title, abstract, summary, conclusions and references.
- Oral and remote (virtual) presentation using PPT and PDF.
- Poster presentation.
