Status Report - CHIMERA Fusion Energy project

Wednesday 21 September 2022 11:25 (20 minutes)

CHIMERA is being built in Sheffield UK by the Culham Centre for Fusion Energy (UKAEA). It will be the only machine in the world able to test components under the unique combination of conditions encountered in large fusion devices. The SCADA control software will use EPICS and is being produced by Observatory Sciences under contract to Jacobs Clean Energy.
