Type: Talk

Status of the SNS Control System

Wednesday 21 September 2022 09:15 (20 minutes)

The Spallation Neutron Source at Oak Ridge National Laboratory has been operating since 2006. The integrated EPICS based control system has performed well but now requires a variety of upgrades to maintain high availability and support facility upgrade projects. These upgrades are largely possible due the flexibility of the EPICS architecture. This talk covers recent system improvements along with plans to keep the control system robust and viable well into the future.

Author: WHITE, Karen (Oak Ridge National Laboratory)

Presenter: WHITE, Karen (Oak Ridge National Laboratory)

Session Classification: Wednesday Morning session

Track Classification: Project Status Reports
