Upgrading to Phoebus

Thursday 22 September 2022 15:10 (20 minutes)

NSLS2 is preparing to migrate from the old eclipse based CS-Studio to the latest version, Phoebus. We have started the migration on 3 of our beamlines. In this talk I hope to share the important findings of our migration process so far and how we intend to proceed with moving the rest of the beamlines and the accelerator over to Phoebus.
