

EPICS Collaboration Meeting September 2022

Contribution ID: 40 Contribution code: CORE/BUILD

Type: **Lightning talk**

Developments in RTEMS and integration in EPICS 7

Friday 23 September 2022 09:20 (5 minutes)

RTEMS is now available in version 6 and includes the FreeBSD network stack. This enables the use of modern protocols like NFSv4, DHCP etc.. This has of course caused incompatibilities to the previously used integration in EPICS which will be fixed step by step. The presentation will provide an overview of ongoing activities in this area.
