Definitely only a strawman to start conversation

would be nice to find talks/roles for about 10 people from China including Yifang, Xinchou, Joao, Gao Jie.

* is the mix of plenary/parallel sessions right?
* Are panels a useful way to stimulate involvement? If so, are the ones I suggested good?
* do we need more/less parallel sessions? We need to pick organizers for each one.
should we use talks on current experiments to attract participants? for example from nearby universities like Hopkins, Penn, Virginia, maybe up to Brown, MIT, Boston, Northeastern, Cornell, Rochester, Buffalo, NYU, Columbia, Rutgers, Princeton, Yale,
* Do we really want a banquet? If so, what price range should we aim at? what do we want?
* what else is needed to attract participants?
* What else?
