

Session Program

6-8 May 2019

Phenomenology 2019 Symposium

QCD & EW II

University of Pittsburgh
Pittsburgh, PA 15260

Monday 6 May

16:30

QCD & EW II

Session | Location: Lawrence Hall, 209 | Convener: Ciaran Williams

16:30–16:45 Anomalous Gauge Couplings from Diboson Production

Speaker
Ian Lewis

16:45–17:00 Electroweak physics with single and diboson final states at CMS

Speaker
Dr Vieri Candelise

17:00–17:15
Observation and measurements of vector-boson scattering with ATLAS

Speaker
Stefanie Todt

17:15–17:30 Electroweak physics with multibosons at CMS

Speaker
Philip Chang

17:30–17:45 Measurements of multiboson production using the ATLAS detector

Speaker
Christophe Pol A Roland

17:45–18:00 ATLAS Searches for VV Resonances

Speaker
Robert Les

18:00–18:15 Search for heavy resonances in diboson final states at CMS

Speaker
Cristina Ana Mantilla Suarez

18:15–18:30 Precision electroweak measurements with ATLAS

Speaker
Tony Kwan

18:30
