Hubble Hullabaloo and String Cosmology

Monday 4 May 2020 16:30 (15 minutes)

The discrepancy in measurements of the Hubble constant H_0 indicates new physics in dark energy, dark matter, or both. Drawing inspiration from string theory, where the dilaton interacts with the other moduli fields to accommodate the Agrawal-Obied-Vafa proposal of fading dark matter, we explore possible solutions to overcome the H_0 problem.

Summary

Author: Prof. ANCHORDOQUI, Luis (City University of New York)

Presenter: Prof. ANCHORDOQUI, Luis (City University of New York)

Session Classification: Cosmology II

Track Classification: Cosmology
