

Session Program

24-26 May 2021

Phenomenology 2021 Symposium

Higgs III

University of Pittsburgh
Pittsburgh, PA 15260

Wednesday 26 May

14:00

Higgs III

Session | **Convener:** Lingfeng Li

14:00–14:15

Studies of the CP properties of the Higgs boson at the ATLAS experiment

Speaker

Ana Luisa Carvalho

14:15–14:30

Searches for new physics in Extended Higgs Sectors in CMS

Speaker

Tanvi Wamorkar

14:30–14:45

Searches for BSM Higgs bosons at ATLAS

Speaker

Sanmay Ganguly

14:45–15:00

Beyond the Standard Model Effective Field Theory: The Singlet Extended Standard Model and Higgs Flts

Speaker

Ian Lewis

15:00–15:15

Combined Higgs boson measurements by the ATLAS experiment and their Effective Field Theory interpretations

Speaker

Jiayi Chen

15:15–15:30

Higgs Production in Association with a Dark-Z at Future Electron Positron Colliders

Speaker

Pierce Giffin

15:30–15:45

Determination of Higgs boson properties in decays to bosons at the ATLAS experiment

Speaker

Anamika Aggarwal

15:45–16:00

Results and Prospects of Radiative and Electroweak Penguin Decays at Belle (II)

Speaker

Soumen Halder

16:00
