

Session Program

25-26 Sept 2017

ASTRO-TS 2017

GALAXY FORMATION

TRIESTE, 128-129
SISSA - Via Bonomea

Monday 25 September

14:00

GALAXY FORMATION

Session | **Location:** TRIESTE, 128-129, SISSA - Via Bonomea

14:00-14:20

Chiara Feruglio - The ALMA view of the life cycle of galaxies

14:20-14:35

Milena Valentini - On the effect of galactic outflows in cosmological simulations of disc galaxies

14:35-14:50

Eda Gjergo - Simulating Galaxy Clusters with Dust Formation and Evolution

14:50-15:05

Anna Zoldan - Size and specific angular momentum: dynamical properties in semi-analytic models

15:05-15:20

Jingjing Shi - The Angular Momentum of ETGs and LTGs

15:20-15:35

Liz Xie - Size evolution of central and satellite galaxies

15:35-15:50

Jean-Philippe Fontaine - The Radial Tully Fisher relation in Dwarf Galaxies

15:50
