

Session Program

12-14 May 2022

LoopFest XX

Thursday Afternoon Session 2

University of Pittsburgh, Benedum Hall 157

Thursday 12 May

16:30

Thursday Afternoon Session 2

Session | Location: University of Pittsburgh, Benedum Hall 157

16:30-16:50 Recent Progress in Two-Loop Five-Point Calculations

Speaker

Ben Page

16:55-17:15

Two-loop QCD corrections to five-particle amplitudes with one massive leg

Speaker

Simone Zoia

17:20-17:40

Wilson loops with Lagrangian insertions, and a prediction for all-plus amplitudes

Speaker

Johannes Henn

17:45-18:00 Non-factorisable contributions to t-channel single-top production

Speaker

J  r  mie Quarroz

18:05-18:25 Automating Antenna Subtraction in Colour Space

Speaker

Matteo Marcoli

18:30
