

## **Session Program**

**12-14 May 2022**

**LOOPFEST** **XX**

## **LoopFest XX**

### ***Saturday Afternoon Session 1***

University of Pittsburgh, Benedum Hall 157

# Saturday 14 May

14:00

## Saturday Afternoon Session 1

**Session** | **Location:** University of Pittsburgh, Benedum Hall 157

14:00–14:20

**Renormalized epsilon-finite master integrals and their virtues: the three-loop self energy case**

**Speaker**

Stephen Martin

14:25–14:40

**Renormalization of twist-two operators and its application**

**Speaker**

Tongzhi Yang

14:45–15:00

**Two-loop tensor integral coefficients in OpenLoops**

**Speaker**

Natalie Schär

15:05–15:25

**Four-loop quark and gluon form factors**

**Speaker**

Andreas von Manteuffel

15:30
