Mon	Tue	Wed	Thur	Friday
Topic A – talks and discussion Topic B talks and discussion	Topic C talks and discussion	Nnbar	Topic D talks and discussion Topic E talks and discussion	Topic F talks and discussion

6-10 talks per session but some may be less, eg new ideas.

Typical session : 09:00-12:00

3 talks per hour (~20 mins)

Topics: neutron decay, nnbar, nn', nEDM, hadronic parity violation, new ideas/others.

+ talk from ESS + discussion with ESS management ?

Status

- Close to getting the speakers situation clarified.
- Please take a look at the list of planned talks in all sessions and comment.
- Fine-tuning
 - Each session to clarify: what can the ESS do and where does it fit into the current and planned experimental and theoretical landscape.
 - Balance between theory/exp.
 - Not always possible but we should try to keep that in mind.
 - Can be brought out in the discussions.
