Exploring CP Violation in the Higgs Sector Through Higgs Boson Production in Association of Three Jets

Tuesday 9 May 2023 17:30 (15 minutes)

In this presentation, I will explore the impact of finite top and bottom quark masses in the computation of scattering cross-sections for Higgs Boson production in association with three jets at Hadron Colliders like the CERN Large Hadron Collider. Additionally, I will offer insights into the expected outcomes for the production of a CP-violating Higgs.
