

Monday 8 May

14:15

Cosmology I

Session | Location: Lawrence Hall 207 | Convener: Jay Hubisz

14:15-14:30 **Cornering Extended Starobinsky Inflation with CMB and SKA**

Speaker

Benedikt Schosser

14:30-14:45 **Gauged quintessence**

Speaker

Jiheon Lee

14:45-15:00

Seeing highly anisotropic gravitational wave backgrounds from phase transitions

Speaker

Arushi Bodas

15:00-15:15 **Enhancing CMB acoustic phase shift with dark matter loading**

Speaker

Daven Wei Ren Ho

15:30-15:45

Cosmic Stasis from Primordial-Black-Hole Evaporation and Its Phenomenological Implications

Speaker

Brooks Thomas

15:45-16:00 **Chiral Plasma Instability in the Early Universe**

Speaker

Tina Kahniashvili

16:00
