Nelson Barr ultra light dark matter

Wednesday 15 May 2024 16:30 (15 minutes)

We show that in the Nelson-Barr solution to the strong CP-problem a naturally light scalar can arise. The dependence of the CKM matrix elements on this new scalar is its predominant coupling. It gives rise to a completely new phenomenology if this field constitutes dark matter, as CKM elements vary periodically in time.

Mini Symposia (Invited Talks Only)

Authors: PEREZ, Gilad (Weizmann Institute); SAVORAY, Inbar (Weizmann Institute of Science); DINE, Michael; RATZINGER, Wolfram (Weizmann Institute)

Presenter: RATZINGER, Wolfram (Weizmann Institute)

Session Classification: Physics Beyond the Standard Model

Track Classification: Other BSM
