

PITT PACC Workshop: Non-Standard Cosmological Epochs and Expansion Histories

Contribution ID: 4

Type: **not specified**

Block III: Gravitational-Wave Signals in Modified Cosmologies - Presentation

Thursday 5 September 2024 16:00 (30 minutes)

Co-Discussion Leaders: Kim Boddy, Lauren Pearce

This block is focused on the gravitational-wave signatures that can arise in cosmological scenarios involving modified expansion histories and the manner in which these signals may be correlated with other observational signatures which might arise in such scenarios.

Presenters: Prof. BODDY, Kimberly (University of Texas at Austin); PEARCE, Lauren (Penn State University-New Kensington)
