

Phenomenology 2025 Symposium

Contribution ID: 167

Type: **not specified**

Exceptional Unification

Tuesday 20 May 2025 14:00 (15 minutes)

Realistic grand unified theories based on the exceptional group E_6 will be presented and their phenomenological implications explored. These include fermion masses, neutrino oscillations, proton decay and a GUT-stabilized dark matter candidate.

Mini Symposia (Invited Talks Only)

Plenary (Invited talks only)
