PBH formation via junction conditions

Tuesday 20 May 2025 14:15 (15 minutes)

We analyse the formation criteria for PBH formation via the Israel-Junction conditions. We find that the usual overdensity condition is a weaker condition when compared to the more fundamental junction conditions. In addition, we look into the PBH formed in fermi-ball scenarios and compare it with known results in the literature.

Mini Symposia (Invited Talks Only)

Plenary (Invited talks only)

Author: RAI, Mudit (Texas AM University)

Co-authors: Prof. DUTTA, Bhaskar; DENT, James (Sam Houston State University)

Presenter: RAI, Mudit (Texas AM University)

Session Classification: Cosmology

Track Classification: Particle Cosmology
