## Recent highlights from the LHCb experiment

*Monday 12 December 2022 12:00 (30 minutes)*

The Large Hadron Collider beauty (LHCb) detector is a single-arm forward spectrometer at the LHC, designed for the study of heavy flavour physics. In this review, an overview of the detector performance and a few recent results in the field of beauty and charm physics are presented. The LHCb experiment has also undergone a major upgrade in preparation for Run 3 of LHC, the talk will also highlight the current activities undertaken during this period.

### Session

Quark and Lepton Flavour Physics

**Author:** Dr MATHAD, Abhijit (University of Zurich)

**Presenter:** Dr MATHAD, Abhijit (University of Zurich)

**Session Classification:** Plenary
