

XXV DAE-BRNS High Energy Physics Symposium 2022

Contribution ID: 791

Type: Minireview Talk

B anomalies: an experimental perspective

Thursday 15 December 2022 15:00 (25 minutes)

A review of results related to the so called B anomalies is presented. The results come both the e^+e^- B factories and LHC. The talk concludes with a discussion of some the recent results from Belle II experiment related to anomalies.

Session

Quark and Lepton Flavour Physics

Author: LIBBY, James (Indian Institute of Technology Madras (IN))

Presenter: LIBBY, James (Indian Institute of Technology Madras (IN))

Session Classification: WG8 - Quark and Lepton Flavour Physics
