

Study the Correlation between Solar Storms and Earthquakes

Tuesday 22 May 2018 15:45 (15 minutes)

Study the number of sunspots from the National Oceanic and Atmospheric Administration; NOAA and events of earthquake from Meteorological Department Thailand. Determine the relationship between astronomical and geological. The solar storm will occur and last is solar cycle about 11 years, whereas events of earthquake will occur continuously. It may not be possible to indicate the earthquakes associated with solar storm.
