Photocathode Physics for Photoinjectors 2018

October 15, 2018 - October 17, 2018

Hilton-Buffalo Thunder

Scientific Program

Session 1: Welcome and Overview

Session 2: Application Oriented Research: Low Average Current

Session 3: Application Oriented Research: FEL

Session 4: Application Oriented Research: Spin Polarized Sources

Session 5: Application Oriented Research: High Average Current

Session 6: Application Oriented Research: Cathode Design

Session 7: Operations and Demonstrations: Normal conducting

Session 8: Operations and Demonstrations - Superconducting & DC

Session 9: Theory and Computation

Session 10: Theory and Computation - continued

Session 11: Novel Research and Applications

Session 12: Novel Research and Applications (and concluding discussion)

Poster Ression
