Session Program

9-13 Jan 2023

8th International Conference on High Energy Physics in the LHC Era

poster Session

Universidad Técnica Federico Santa María, Building T Avda. España 1680, Valparaíso, Chile

Wednesday 11 January

Poster Session	ession: posters session and coffee break
Phenomer 3-3-1 mod	nological aspects of the fermion and scalar sectors of a \$S_4\$ flavore
Speaker	
Ms Maria Luis	sa Mora Urrutia
Search for LHC	r Magnetic Monopoles produced via the Schwinger Mechanism at the
Speaker	
Mr Adıtya Upi	reti
Superposi Potentials	ng and Decay Process of Mass-Massless Type Two Identical Wave
Speaker	
Ms Sheetal D	nungana
The renor	malization scale-setting problem in QCD
Speaker	
Daniel Salina	s-Arizmendi
Sensitivity	y of direct detection experiments to neutrino magnetic dipole momer
Speaker	
Rocío Branad	a Balbontín
Gamma ra	y signals from primordial black hole evaporation
Speaker	
Luis Recabari	ren
Predictive	extended 3HDM with \$S_4\$ family symmetry.
Speaker	
Juan Manuel	Marchant González
Productio	n of Mono-Higgs and Mono-Z in the Minimal Spin-one Isotriplet Dark
Matter Mo	odel in pp Collisions
Speaker
