

## **Session Program**

**12-14 Jun 2019**

**Cosmology and Particles, June 12-14**

***Wednesday aft.***

UBB Chillan, Bldg E  
UBB Chillan Avda. Andres Bello 720 Chillan

# Wednesday 12 June

14:00

## Wednesday aft.: first

Session | Location: E4

14:00–14:25

### Renormalization in a higher-order Lorentz symmetry breaking model

#### Speaker

Marat Reyes

14:25–14:50

### Including magnetic effects in QCD Finite Energy Sum Rules

#### Speaker

Cristian Villavicencio

14:50

15:05

## Wednesday aft.: second

Session | Location: E4

15:05–15:30

### One-loop divergences in 7D Einstein and 6D Conformal Gravities

#### Speaker

Danilo Diaz

15:30–15:55

### Bayesian Comparison of Cosmological Models

#### Speaker

Antonella Cid

15:55

16:10

## Wednesday aft.: third

Session | Location: E4

16:10–16:35

### Emergent Universe by Tunneling in a Jordan-Brans-Dicke Theory

#### Speaker

Pedro Labraña

16:35–17:00

### TBA

#### Speaker

Leandro Monje

17:00–17:25

### Analytical solution to nonsinglet DGLAP}}{Analytical solution to DGLAP integro-differential equation with running gauge coupling

#### Speaker

Igor Kondrashuk

17:25
