Emergent Early Universe Cosmology

Robert Brandenberger
Physics Department, McGill University

PPC 2022, June 6 - 10, 2022

Motivation

Emergent

R. Branden-
berger

TCC

Scenarios

Matrix Theory
Cosmology

Conclusions

- **Inflationary Scenario** is the **current paradigm** of **early Universe cosmology**.
- Inflation is usually analyzed using an **effective field theory (EFT)** framework.
- **Fundamental conceptual problems** for an **EFT** description of a rapidly expanding universe.
- **Unitarity problem, inconsistency with the 2nd law of thermodynamics.**
- We need to look beyond an EFT description of the early universe!
- **Matrix Theory Cosmology**: Emergent time, space and early universe from the **BFSS** matrix model.

Motivation

Trans-Planckian Problem

J. Martin and R.B., *Phys. Rev. D63*, 123501 (2002)

Emergent

R. Branden-
berger

TCC

Scenarios

Matrix Theory
Cosmology

Conclusions

- **Success of inflation:** At early times scales are inside the Hubble radius \rightarrow causal generation mechanism is possible.
- **Problem:** If time period of inflation is more than $70H^{-1}$, then $\lambda_p(t) < l_{pl}$ at the beginning of inflation.
- \rightarrow breakdown of effective field theory; new physics **MUST** be taken into account when computing observables from inflation.

Trans-Planckian Censorship Conjecture (TCC)

A. Bedroya and C. Vafa., arXiv:1909.11063

Emergent

R. Brandenberger

TCC

Scenarios

Matrix Theory
Cosmology

Conclusions

No trans-Planckian modes exit the Hubble horizon.

$$ds^2 = dt^2 - a(t)^2 dx^2$$

$$H(t) \equiv \frac{\dot{a}}{a}(t)$$

$$\frac{a(t_R)}{a(t_i)} \Big|_{pl} < H(t_R)^{-1}$$

Effective Field Theory (EFT) and the CC Problem

Emergent

R. Branden-
berger

TCC

Scenarios

Matrix Theory
Cosmology

Conclusions

- EFT: expand **fields** in comoving Fourier space.
- Quantize each Fourier mode like a harmonic oscillator
→ ground state energy.
- Add up ground state energies → CC problem.
- The usual quantum view of the CC problem is an artefact of an EFT analysis!

Effective Field Theory (EFT) and the CC Problem

Emergent

R. Branden-
berger

TCC

Scenarios

Matrix Theory
Cosmology

Conclusions

- EFT: expand **fields** in comoving Fourier space.
- Quantize each Fourier mode like a harmonic oscillator
→ ground state energy.
- Add up ground state energies → CC problem.
- The usual quantum view of the CC problem is an artefact of an EFT analysis!

Application of the Second Law of Thermodynamics

S. Brahma, O. Alaryani and RB, arXiv:2005.09688

Emergent

R. Branden-
berger

TCC

Scenarios

Matrix Theory
Cosmology

Conclusions

- Consider **entanglement entropy density** $s_E(t)$ between sub- and super-Hubble modes.
- Consider an **phase of inflationary expansion**.
- $s_E(t)$ increases in time since the phase space of super-Hubble modes grows.
- **Demand:** $s_E(t)$ remain smaller than the post-inflationary thermal entropy.
- \rightarrow Duration of inflation is bounded from above, consistent with the TCC.

Application to EFT Description of Inflation

TCC

Scenarios

Matrix Theory
Cosmology

Conclusions

Starting point: BFSS matrix model at high temperatures.

- BFSS model is a quantum mechanical model of 10 $N \times N$ Hermitean matrices.
- Note: no space!
- Note: no singularities!
- Note: BFSS matrix model is a proposed non-perturbative definition of M-theory: 10 dimensional superstring theory emerges in the $N \rightarrow \infty$ limit.

BFSS Model (bosonic sector)

T. Banks, W. Fischler, S. Shenker and L. Susskind, Phys. Rev. D **55**, 5112 (1997)

Emergent

R. Branden-
berger

TCC

Scenarios

Matrix Theory
Cosmology

Conclusions

$$L = \frac{1}{2g^2} \left[\text{Tr} \left(\frac{1}{2} (D_t X_i)^2 - \frac{1}{4} [X_i, X_j]^2 \right) \right]$$

- $X_i, i = 1, \dots, 9$ are $N \times N$ Hermitean matrices.
- D_t : gauge covariant derivative (contains a matrix A_0)

't Hooft limit: $N \rightarrow \infty$ with $\lambda \equiv g^2 N = g_s l_s^{-3} N$ fixed.

Thermal Initial State

N. Kawahara, J. Nishimura and S. Takeuchi, JHEP **12**, 103 (2007)

Emergent

R. Brandenberger

TCC

Scenarios

Matrix Theory
Cosmology

Conclusions

- Consider a high temperature state.
- At high temperatures, the bosonic sector of the (Euclidean) BFSS model is well approximated by the bosonic sector of the (Euclidean) **IKKT matrix model**.
- $S_{BFSS} = S_{IKKT} + \mathcal{O}(1/T)$
- Matsubara expansion:

$$X_i(t) = \sum_n X_i^n e^{2\pi i n t}$$

$$A_i \equiv T^{-1/4} X_i^0$$
