High Scales masses, for one model coming of E_6 Gauge Group

We explore the possibility of achieving unification of the standard model coupling constants in a possible way to E_6 breaking pattern, $E_6 \rightarrow SU(3)_c \otimes SU(2)_L \otimes U_I \otimes U_{51\bar{I}} \otimes U_{32\bar{I}}$. We find in this particular pattern that, the unification scale occurs at 2×10^{16} TeV.
