## High Scales masses, for one model coming of $E_6$ Gauge Group

We explore the possibility of achieving unification of the standard model coupling constants in a possible way to  $E_6$  breaking pattern,  $E_6 \rightarrow SU(3)_c \otimes SU(2)_L \otimes U_1 \otimes U_{51\bar{1}} \otimes U_{32\bar{1}}$ . We find in this particular pattern that, the unification scale occurs at  $2 \times 10^{16}$  TeV.
