Some aspects of Neutrino Physics

Thursday 28 July 2022 14:00 (1 hour)

During the +90 years since their theoretical proposal, the interest on neutrinos has steadily increasing. Neutrinos play an important role in different aspects of particle physics, astrophysics and cosmology, and a large community of researchers keep looking for understanding the physics and phenomenology governing these fascinating particles. In this talk, we present an introduction to some of the relevant and active topics of neutrino physics, giving also some provocative insights on the areas where neutrino physics is being applied.
