

Third Workshop on Current Challenges in Cosmology

Contribution ID: 38

Type: **not specified**

Behind the scenes of an experiment

Monday 23 October 2023 14:00 (1 hour)

Understanding the expansion of the universe is the top priority of all space agencies. In this talk, we will discuss the primary cosmological observables capable of shedding light on these mysterious phenomena. We will also focus on the intense efforts that the European Space Agency is undertaking to understand the nature of accelerated expansion. In particular, we will present the Euclid Satellite.

Presenter: SAPONE, Domenico (FCFM, Universidad de Chile)
