

PHAROS Conference 2020: The multi-messenger physics and astrophysics of neutron stars

Contribution ID: 41

Type: **Oral Presentation**

Transitional millisecond pulsar binaries during active radio pulsar state

Wednesday 1 April 2020 12:45 (15 minutes)

The multi-band variability of transitional millisecond pulsar binaries and redbacks during active radio pulsar state will be presented, comparing their properties over a wide energy range to understand whether all, if any, redback is prone to make transition to an accretion powered state.

Author: Dr DE MARTINO, Domitilla (INAF - Osservatorio Astronomico di Capodimonte Napoli)

Presenter: Dr DE MARTINO, Domitilla (INAF - Osservatorio Astronomico di Capodimonte Napoli)

Session Classification: Parallel 1A

Track Classification: Neutron stars in binary systems and accretion
