

19th International Conference on QCD in Extreme Conditions (XQCD 2023)

Contribution ID: 119

Type: **Invited Talk**

Recent progress in lattice QCD at non-zero temperature and density

Friday 28 July 2023 09:00 (45 minutes)

I will review the progress in lattice QCD at non-zero temperature and density, including the calculations of the equation of state at non-zero baryon density, the nature of the chiral transition as function of the quark mass and quantities related to heavy flavor probes of hot matter. The latter includes, the lattice calculation of the heavy quark diffusion constant, heavy quark potential and quarkonium properties at high temperatures.
