

## Detection and Dynamics of Exoplanets (DDE): Interplay between theory and observations

Contribution ID: 47

Type: **not specified**

### PLATOSpec, new instrument for characterizing exoplanetary systems

*Tuesday 8 July 2025 11:42 (1 minute)*

PLATOSpec is a new echelle spectrograph with resolving power of 70,000, installed at former ESO 1.52-m telescope at La Silla. We would like to present new results from the science verification which include observing of Rossiter-McLaughlin effect of selected systems and also stellar activity characterisation.

**Presenter:** KABÁTH, Petr (Astronomical Institute of the Czech Academy of Sciences)

**Session Classification:** Poster Session
