

Detection and Dynamics of Exoplanets (DDE): Interplay between theory and observations

Contribution ID: 61

Type: **not specified**

Resonant state of planetary systems

Tuesday 8 July 2025 15:30 (15 minutes)

I provide a standardized framework based on the second fundamental model of resonance to characterize the resonant state of planetary systems. This framework allows to easily distinguish systems that evolved through tidal dissipation from other systems.

Presenter: COUTURIER, Jérémy (Geneva Observatory)

Session Classification: Stability and dynamics of planetary systems
